

# IPS Deskside & Tabletop Shredders

IPS301  
IPS302 IPS303

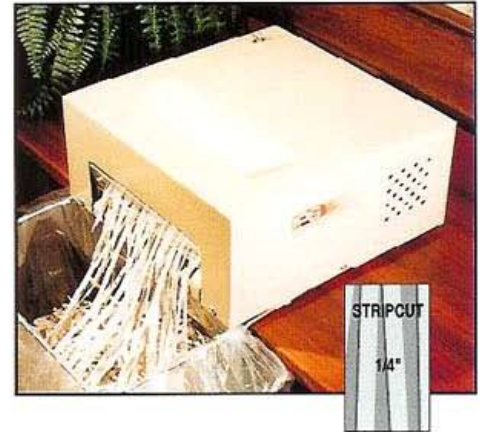

## Hands-Free Control

The 300 series and above electronic console models are equipped with user friendly electronic features to increase productivity. The three position rocker switch provides the operator with forward - stand by on, off, and reverse modes. Stand-by mode allows instant hands free shredder operation. The stand-by mode is established by activating the forward control rocker or push-button on the touch pad. The shredder remains inactive until paper fed into the shredder's chute breaks the optic sensor beam; documents are then shredded instantaneously. The shredder remains in operation for as long there is paper being fed into it.

## Table Top Models IPS10T

## IPS16T

To ensure efficient use of vital office space when space is a factor in shredder selection, IPS has a table top solution! The IPS10T and IPS16T offer maximum shredder performance at a minimum footprint requirement. The table top models are equipped with a three position control knob: Forward - Off - Reverse.

The IPS 300 series shredders are designated as "deskside" models under the general office shredder category. They feature an attractive full wooden console, castor mounted for easy mobility, a safety interlocked front access door, 9.5" infeed throat, 1/2 hp drive motor, photo cell automatic start/stop, visual alarm indicator and automatic shredder shut-down for bag full, door open, and paper jam conditions. The IPS 300 series shredders consist of a 1/8" strip cut model (the IPS301), a 1/8" x 1 3/16" cross-cut model (the IPS302), and a **D.O.D. spec., NSA approved**, 1/32" x 7/16" particle size, high security model (IPS 303) designed specifically for Federal agencies, and the US Military, Classified use.
