

IPS Personal, Home Office & Small Business Shredders

IPS 50

Designed to meet the growing requirements for "personal", as well as "home office" information security, the IPS Model IPS50 is equipped with a 9" infeed throat width, manual on/off/reverse control rocker switch and an integral "lift off" wastebasket console base. The cutter head has an operator safety limit device to prevent operation during shred waste disposal. The IPS50 can accept up to 5 sheets per feed, generating a 1/4" strip shred; adequate to satisfy all "Privacy Act" document destruction requirements for government or business purposes. Ideal for banking, credit card records, and IRS tax information.

IPS 90 IPS 92

A step up in performance capabilities, the 90 series paper shredders introduce the "standby" operation feature prevalent throughout the IPS line. The IPS90 and IPS92 are equipped with a 9 1/2" infeed throat width, and manual rocker control switch for standby, off, and reverse modes. In standby mode, paper is fed to the shredder, an electro-mechanical sensor automatically starts and stops the shredder in the presence and absence of paper. An integral "lift off" wastebasket console base (equipped with safety device to prevent operation during shred waste disposal) allows for easy disposal of waste. The 90 series are available in either 1/8" strip cut (IPS90) or 3/32" x 1" crosscut (IPS92) configurations.

Sheet capacities vary from stripcut (6-8 sheets) to crosscut (4-6 sheets), but the enhanced performance makes the 90 series shredders an excellent choice for the home or small office.

IPS 101 IPS 102

The IPS 100 Series "small office" shredders, the models IPS101 stripcut and IPS102 crosscut, are similar in performance capabilities to the IPS90 series units, with the added benefit of a more traditional office shredder look. The shredders feature a 9 1/2" infeed throat width, hinged front access door, a "discard" chute for disposal of non-shreddable waste directly into the bag receptacle, a bag hanger, and steel bag hanger rack. The front access door allows for easy shredder waste removal and bag replacement without lifting various shredder components. The IPS100 series shredders feature automatic operation of standby mode, and a safety limit device to prevent operation during bag change.

Document Shredders	IPS50	IPS90	IPS92	IPS101	IPS102
Feed Width	9"	9 1/2"	9 1/2"	9 1/2"	9 1/2"
