RAMJ Cost Saving Value... Marathon's RJ-225 Ultra® Stationary Compactor: highly efficient, economical compaction equipment for today's cost conscious waste generators. The RJ-225 Ultra provides the cost-saving benefits of solid waste compaction including labor reduction, fewer collection pick-ups, and space savings. Superior Design & Construction... The RJ-225 Ultra's Side-Mounted Power Unit shown Marathon now offers the first Side-Mounted Power unit without weather cover. Note in the industry. This design offers the convenience and

ease-of-maintenance of a remote power pack along with the space savings of an integrated power pack. Other unique design features include:

- New configuration that eliminates ALL electrical components from the inside of the compactor.
- Operator accessible Reset Button for the Motor Starter to eliminate entry into the control box.
- Advanced, simplified Two Button Operation.
- Limit Switch attached to the outside of the compactor body for ease-of-maintenance and damage protection.

the Limit Switch is also on the exterior of the compactor body.

Performance...

The RJ-225 Ultra compactor is fully automatic. Simply dump waste into the large 40 1/2" x 60" charge box opening and turn the key. After the compaction cycle completes, the unit shuts down automatically. Key operation gives the operator absolute control over compactor use, eliminating expensive sharing of waste receptacles.

The packing ram is supported by specially formulated cast iron shoes which ride on replaceable wear strips. This exclusive design protects the charge box floor from the full force of the packing ram, extending the life and dramatically reducing compaction-robbing friction.

Specifications:

Charge Box Capacity		
[Mfrs. Rating]	2.0 cy	1.5 m³
Clear Top Opening	40.5" X 60"1029	9mm x 1524mm
Capacity Per Hour	100 cy	76 m ^a

Performance Characteristics:

Cycle Time	56 s	56 s
Total Normal Force		
Total Maximum Force	52,300 lb	233 kN
Normal Ram Face Pressure	25.2 psi	174 kPa
Maximum Ram Face Pressure.	30.1 psi	207 kPa
Ram Penetration	14"	356 mm

Electrical Equipment:

Electrical Motor 3/60-208/230	0/460 10 hp7.4 kW
Electrical Control Voltage	120 VAC120 VAC
	NEMA 3R, All Circuits Fused
Standard 2 Button Controls:	Keylock Start/Mushroom Stop
Connected to 13' Scattite	

Hydraulic Equipment:

Hydraulic Pump Capacity	13 gpm	49 L/min.
Normal Pressure	1550 psi	105 bar
Maximum Pressure	1850 psi	125 bar
Hydraulic Cylinder Bore	6"	152 mm
Hydraulic Cylinder Rod		

RAMJET RJ-225 Ultra

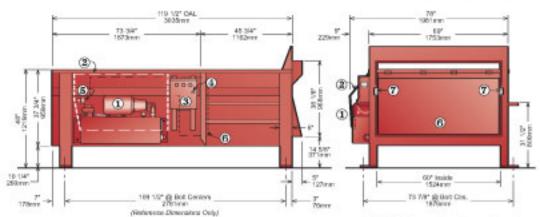

The RJ-225 Ultra features an advanced, simplified control system with 2 button operation. It is key-operated and fully automatic. The heavy duty push button controls are contained in a weatherproof NEMA 13 enclosure. Connected to the power pack with 13' of sealtite, the controls can be located for operator convenience.

Optional Features Available:

 The optional TrashMinder® is the most advanced method for reporting and measuring container fullness as well as for managing user access and billing. For a detailed description see Marathon's TrashMinder® brochure.

- Side-Mount Power Unit
- (2) Power Unit Weather Cover
- (3) Motor Control Panel
- (4) Motor Starter Reset Button
- (5) Limit Switch
- Ram
- Ram Guide Shoes with Replaceable Wear Strips

Concrete Pad Requirements 6" (152mm) Thick Rainforced 3000 PSI Concrete (4) 39" (20mm) Anchor Betta (Min.)

- Multi-cycle timer, dual controls, ozone odor control system, hoppers and many other options are also available as well as a full line of compaction containers.
- Chutes can be constructed to meet your specifications and needs. They reduce the risk of pilferage of valuable merchandise or tools by eliminating a person's ability to hide items in the trash in order to recover them later from the waste receptacle.
