

IPS401 IPS411
IPS402 IPS412 IPS413

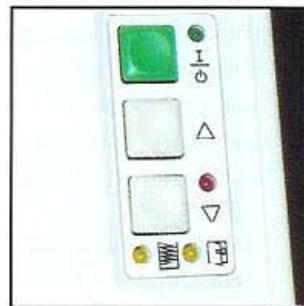

The IPS 400 series shredders are rated as "departmental" models under the general office shredder category. They feature 10" infeed throat widths, and 1 hp drive motors. These models make outstanding all-around office shredders. Composite wood/plastic consoles make the 400 series shredders "whisper quiet." Features include automatic start/stop via optic sensor; anti-jam auto reverse; audible/visual alarm indicators for bag full, door open and anti-jam safety limits. The 400 series are shipped complete with a starter packet to include: sample bags & oil, operator instructions, and single tier forms rack. Console models are castor mounted for easy mobility. The IPS413 is a **D.O.D. spec**, 1/32" x 7/16" **NSA approved**, crosscut shredder for the destruction of Classified Documents, through Top Secret.

3 Tier Forms Rack

All IPS 400 series shredders are provided with a single tier forms feed rack; optional three tier forms rack is available (see accessories page 8).

Hands-Free Control

Silent standby mode allows instant, hands-free operation whenever paper is entered into the throat. "Constant-ON" speeds the work of large amounts of files. Automatic reverse prevents overloads when too much paper is fed. Audible and visual indicators for bag full and door open conditions.

IPS400

IPS offers two open base stand model shredders for continuous forms destruction and larger waste volume collection. The IPS 400 stand unit has a 10" infeed throat width, manual operation rocker switch control with Forward - Off - Reverse mode settings, auto-shredder shut down, and "bag full" limit device. The stand base is of all metal construction, and the shredder is shipped in three separate containers.
