- Cardboard: Up to 132 lbs
- Plastic: Up to 176 lbs

Chamber dimension (internal)

- Width: 32"
- Depth: 24"
- Height: 40"

Weight (machine)

- Total: 838 lbs
- Noise level: 62.4 db (A)

- Protection class: IP 55

Operating power

Single Phase 115 V, 60 Hz, 10 A

The newly launched Orwak 3115 is a small and compact baler, yet it is a larger and more powerful machine than its smaller cousins, the 3105 and 3110.

The Orwak 3115 is ideal for small volumes of plastic foil, but it is also designed for compacting cardboard. A material selector makes selection easy!

Adjustable bale size

The cardboard bales weigh up to 132 lbs, and the Orwak 3115 offers three different sizes of bale height for more flexible waste management. The bales are easily ejected and transported with the Orwak bale trolley.

Prepared for cross-binding

The Orwak 3115 is prepared for cross-binding - a function that helps secure the bales and one that is particularly useful when compacting small pieces of material.

Pocket for operating manual

Transparent covers for strap reels

Integrated door lock handle

New aesthetic design

Material selector for cardboard and plastic Full bale indicator Service indicator

Adjustable bale height

Autostart for efficient compaction

An autostart function allows the baler to start compacting the material as soon as you close the door.

Silent operation

Due to a new type of hydraulics, Orwak has introduced "the silent family" - a line of balers with low sound emission. A silent operating machine contributes to a better working environment.

Our promise to You!

- Orwak financial solutions
- Orwak non-stop service
